How to open eye drop bottle ?

Tear off the seal from sterile tamper proof ROPP Cap

Tighten the cap on the nozzle. The spike in the cap will pierce the tip of the vial

Dispense drops with gentle pressure. Replace the cap after every use.

How to instill eye drop ?

Wash your hands thoroughly with soap and water

Avoid touching the dropper tip against your eye or anything else - eye drops and droppers must be kept clean

While tilting your head back, pull down the lower lid of your eye with your index finger to form a pocket

Hold the dropper (tip down) with the other hand, as close to the eye as possible without touching it

While looking up, gently squeeze the dropper so that a single drop falls into the pocket made by the lower eyelid. Remove your index finger from the lower eyelid

Replace cap on the bottle after use and tighten
